The screenshot shows the Eclipse IDE interface with the following details:

- File Menu:** The "File" menu is open, showing options like "New", "Open File...", "Project", "Recent Files", "Save", "Print...", "Import...", "Export...", "Properties", "Switch Workspace", and "Restart".
- New Submenu:** The "New" submenu is open, listing various project and file types: Java Project, Project..., Package, Class, Interface, Enum, Annotation, Source Folder, Java Working Set, Folder, File, Untitled Text File, Task, JUnit Test Case, Example..., and Other... (with keyboard shortcut ⌘N).
- Central Area:** The workspace shows a single Java file named "tes2.java" with the main method defined.
- Right-hand Viewers:** The "Task List" viewer shows a search bar and filter buttons for "All" and "Activate...". The "Outline" viewer shows the class structure with the main method highlighted.
- Bottom Bar:** The bottom navigation bar includes tabs for "Problems", "Javadoc", "Declaration", "Console" (which is currently active), and "Debug".

New Java Project

Create a Java Project

Create a Java project in the workspace or in an external location.

Project name:

Use default location

Location:  [Browse...](#)

JRE

Use an execution environment JRE:

Use a project specific JRE:

Use default JRE (currently 'Java SE 8 [1.8.0\_101]') [Configure JREs...](#)

Project layout

Use project folder as root for sources and class files

Create separate folders for sources and class files [Configure default...](#)

Working sets

Add project to working sets [New...](#)

Working sets:  [Select...](#)

The use of the default package is discouraged.

Source folder: TheNameOfMyProject/src

Package: (default)

Enclosing type:

Name: MyJavaClass

Modifiers:  public  package  private  protected  
 abstract  final  static

Superclass: java.lang.Object

Interfaces:

Which method stubs would you like to create?

public static void main(String[] args)  
 Constructors from superclass  
 Inherited abstract methods
